

Digital Thermo-Hygrometer with thermocouple type K

Code. KJR015

1. High-definition LCD display with backlight for clear viewing.
2. Made of high quality rubber material, it is comfortable to operate and avoids dropping.
3. Contact temperature measurement with K-type thermocouple and single contact temperature measurement.
4. The probe is resistant to high temperature, corrosion, bending and continuous use.
5. Automatic and manual shutdown.
6. Selection of °C/°F.
7. Battery level indication. Required 1 x 9V type 6F22 PP3 (not included).
8. Data hold function.
9. Sampling rate: 2.5 times/second.
10. Dual display of temperature and humidity.

Technical specifications

Temperature

Range	-10.00 ~ +50.00 °C (Type-K: -20.00 ~ +1000,00 °C)
Resolution	0,1°C (Type-K: 1° C)
Precision	±1.5 °C

Humidity

Range	5 ~ 98 %HR
Resolution	0.1 % HR
Precision	±5% HR (5-40% HR); ±3% HR (41-80% HR)

Battery 1 x 9V (6F22 PP3)

Working environement 0°C ~ 50°C, RH = 95%

Input impedance 1012 Ohm

Dimensions 156 x 66 x 33 mm

Includes:

- 1 type K probe.
- 1 humidity probe with handle and integrated temperature sensor.
- 1 user manual.
- 1 blue plastic case and cardboard box.
